The Alberta Pacific Grain Co. (1943) Ltd.

Town & District

Carl Schewer who is a member of the armed forces and is located in Ontario is at present in town visiting his parents and relatives.

A fare well tea in honor of Mrs. Lloyd Anderson was held at the home of Mrs. Art Jones. Co-hostesses with Mrs. Jones were Mrs. J. Bell and Mrs. C. Kilcup. An enjoyable evening

was spent with contest honors going to Mrs. F. Wallace and Mrs. N. Sherback. After a sing-song Mrs. Bell presented Mrs. Anderson with a gift of china consisting of six cups and saucers and a cake plate in American Beauty Rose pattern. Mrs. Anderson in a few well chosen words thanked her many friends and invited them to visit her in her new home. A delicious lunch was then served. Mrs. and Mr. Anderson and family left Wednesday for Saskatchewan where Mr. Anderson will operate his father's farm.

After a week of fine warm weather climaxed by a very warm Sunday the weather turned colder at night and by Monday morning snow covered the ground. The snow has since disappeared but the weather is gradually getting warmer.

Mrs. W. Varnell and daughter Ruby, left on the early Saturday morning train for Vancouver where they will reside. Ted Varnell who is a member of the R.C.M.P. also lives there. The Varnells first came to Gleichen shortly before the first World War. At the end of the war they moved to the coast and after several years there moved back to Gleichen where they have lived ever since. Miss Varnell has been in charge of the local telephone exchange for several years and she was a most obliging young lady.

Can we have too much color in the garden? That, says P. D. McCalla, supervisor of horticulture, depends on the kind of garden and tastes of the owner. To the flower lover a riot of color may express his heart's desire, but the place for this is probably in the private enclosure behind the house where it will not detract from the unity of the home approach. The modern trend in both rural and urban landscaping is to plan the house and garden as a whole. Neither should detract from the appearance of the other.

Large masses of brilliant bloom attract and hold the eye instead of allowing it to travel beyond the surroundings to the home itself. When at last the attention is diverted the house is viewed as a separate object instead of the house and grounds being seen as a complete picture. The restful atmosphere that we associate with the home surroundings can best be effected by the greens of well kept lawns, shrubs and trees. Flowers are needed to brighten the prospect, but they should not be allowed to steal the show. This is of special importance when planning a home approach. The modern trend is away from the hedged enclosure to the long fairly open approach to the house. A low hedge near the roadside, backed by specimen trees makes an intriguing frame for the home and garden and presents a pleasing picture to the passerby and the approaching guest. Green should predominate in the landscape as well as in the last escape as well but if it not strewn too loudly, splashes of brilliantly colored flowers can do much to add charm and gaiety to the surroundings. As in most things, moderation should be the watchword here.

In Canada and the United States are probably one million persons whose crops have been damaged by fish exporting country.

Retail grocery sales in Canada during the first quarter of 1951 were up 16.6 percent over the same period of 1950.

NEW RADIO RECEIVING LICENCES AVAILABLE

New Radio Receiving Licences are obtainable from Post Offices, Radio Dealers, Radio Servicesmen, certain Banks and in certain districts from house-to-house canvassers.

Where not available locally, Radio Receiving Licences may be obtained from the Controller of Telecommunications Department of Transport, Ottawa.

Winnipeg, Manitoba.

Stem Rust - What's Ahead for 1952

A plain statement of the situation is that there is still a threat to wheat production in Western Canada in 1952. None of the wheat varieties now grown commercially in the Prairie Provinces are resistant to Race 15B. Race 15B of stem rust caused considerable damage in grain crops in central Mexico. Stem rust has already been found in Texas. However, crop conditions in that State are unfavourable for the development and spread of rust. Present indications are that there will be no important "hitch-up" of rust in Texas this Spring. Crop conditions in Oklahoma and Kansas, however, are excellent, and it is possible that a heavy outbreak of stem rust may occur in those States this Spring. If this happens, and the prevailing winds are just right (from the South), billions of spores of Race 15B of stem rust may invade and infect the wheat fields of Western Canada during the critical months of June and July.

Farm Value Goes Up!

"SAY NEIGHBOR! How much did it cost you to get your farm electrified?"

"WELL... the way I look at it, it didn't cost me a red cent!"

I look on it as an investment... like a new barn... or a new house. It increased the value of my farm by more than double the amount I invested in line construction costs and building wiring costs... that's what the real estate man tells me."

Here is another point... now that I know how much kiddy can do for me by increasing production, saving time and labour, and helping my wife in the home - I wouldn't be without the power if it cost me five times as much as it did.
